THE NEXT STAGE IN HUMAN EVOLUTION IS ALMOST HERE...

BUT WILL HOMO SAPIENS SURVIVE?

The year is 2065. Environmental and social chaos are destroying all life on earth. Food supplies have dwindled to almost nothing. The wealthiest live in gated cities; everyone else ekes out an existence in gang-ruled shanty towns.

Michael Khan, a geneticist struggling to save his wife from a deadly virus, is recruited by a secret organization to engineer the next stage in the evolution of Homo sapiens: highly immune to disease and extremely cooperative.

When the military learns of his research, they hire him to help create a bio-weapon to be used against invading forces. However, the military has its own agenda, and Michael soon learns that nobody, not even his own government, can be trusted.
