Stefan Broghammer

Python Regius - Atlas of Color Morphs, Keeping and Breeding (Ball Pythons). Stefan Broghammer
No other species of giant snake is bred in a comparable variety of color patterns as the ball python.
Its robust constitution and easily fulfilled demands on husbandry conditions make it perfectly suited for breeding projects of this kind as well as an almost 'normal' pet.

Stefan Broghammer is the leading German expert on the husbandry and breeding of ball pythons. He has been importing potentially new color morphs directly from Africa for many years, knows from his own observations how the snakes live there, and is regarded as a pioneer in the field of designer morph breeding.

With this comprehensive atlas, Stefan Broghammer does not only discuss in detail the preconditions required to successfully keep and propagate ball pythons, but also provides an all-inclusive in-depth portrayal of all morphs available at present. The wealth of unique photographs alone - over 1,100 - makes his treatise a feast for the eyes!

Hardcover, 356 pages.
