Dive into the business intelligence (BI) features in SharePoint 2010—and use the right combination of tools to deliver compelling solutions. This practical guide helps you explore several BI application services available in SharePoint 2010 and Microsoft SQL Server 2008 R2. You'll learn each technology with step-by-step instructions, and determine which ones work best in specific BI scenarios—whether you're a SharePoint administrator, SQL Server developer, or business analyst.

- Choose the BI tools that meet your needs—and learn how they work together
- Examine the BI lifecycle, from determining key performance indicators to building dashboards
- Take Microsoft Excel further—gain more control and functionality with web-based Excel Services
- Mash up data from multiple sources using PowerPivot for Excel 2010
- Create data visualizations with objects, context, and metrics using Microsoft Visio Services
- Build dashboards, scorecards, and other monitoring and analysis tools with PerformancePoint Services
- Use SharePoint to view BI reports side by side, no matter which tools were used to produced them

Your companion web content includes:

- Interactive exercises that help you try out concepts or techniques
- Code samples that enable you to work with the exercises

From reader reviews:

Phillip Ruiz:

Information is provisions for folks to get better life, information currently can get by anyone in everywhere. The information can be a information or any news even restricted. What people must be consider if those information which is from the former life are hard to be find than now's taking seriously which one works to believe or which one often the resource are convinced. If you receive the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All those possibilities will not happen inside you if you take Business Intelligence in Microsoft SharePoint 2010 (Business Skills) as your daily resource information.

John Ferguson:

Playing with family within a park, coming to see the coastal world or hanging out with buddies is thing that usually you have done when you have spare time, after that why you don't try point that really opposite from that. Just one activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Business Intelligence in Microsoft SharePoint 2010 (Business Skills), it is possible to enjoy both. It is great combination right, you still desire to miss it? What kind of hang-out type is it? Oh occur its mind hangout men. What? Still don't understand it, oh come on its identified as reading friends.

Sonia Shipley:

Are you kind of hectic person, only have 10 as well as 15 minute in your day time to upgrading your mind talent or thinking skill possibly analytical thinking? Then you are experiencing problem with the book compared to can satisfy your short period of time to read it because this time you only find publication that need more time to be examine. Business Intelligence in Microsoft SharePoint 2010 (Business Skills) can be your answer mainly because it can be read by a person who have those short spare time problems.

Tiffany Serna:

What is your hobby? Have you heard that question when you got pupils? We believe that that problem was given by teacher on their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person including reading or as looking at become their hobby. You should know that reading is very important as well as book as to be the thing. Book is important thing to increase you knowledge, except your teacher or lecturer. You find good news or update in relation to something by book. Different categories of books that can you choose to adopt be your object. One of them is actually Business Intelligence in Microsoft SharePoint 2010 (Business Skills).
