B. Prabhakaran

## **Multimedia Database Management Systems (The Springer International Series in Engineering and Computer Science) B. Prabhakaran**

*Multimedia Database Management Systems* presents the issues and the techniques used in building multimedia database management systems.

Chapter 1 provides an overview of multimedia databases and underlines the new requirements for these applications. Chapter 2 discusses the techniques used for storing and retrieving multimedia objects. Chapter 3 presents the techniques used for generating metadata for various media objects. Chapter 4 examines the mechanisms used for storing the index information needed for accessing different media objects. Chapter 5 analyzes the approaches for modeling media objects, both their temporal and spatial characteristics. Object-oriented approach, with some additional features, has been widely used to model multimedia information. The book discusses two systems that use object-oriented models: OVID (Object Video Information Database) and *Jasmine*. The models for representing temporal and spatial requirements of media objects are then studied. The book also describes authoring techniques used for specifying temporal and spatial characteristics of multimedia databases. Chapter 6 explains different types of multimedia queries, the methodologies for processing them and the language features for describing them. The features offered by query languages such as SQL/MM (Structured Query Language for Multimedia), PICQUERY+, and Video SQL are also studied. Chapter 7 deals with the communication requirements for multimedia databases. A client accessing multimedia data over computer networks needs to identify a schedule for retrieving various media objects composing the database. The book identifies possible ways for generating a retrieval schedule. Chapter 8 ties together the techniques discussed in the previous chapters by providing a simple architecture of a distributed multimedia database management system.

*Multimedia Database Management Systems* can be used as a text for graduate students and researchers working in the area of multimedia databases. In addition, the book serves as essential reading material for computer professionals who are in (or moving to) the area of multimedia databases.

### **From reader reviews:**

#### **Vincent Overly:**

In this 21st hundred years, people become competitive in each and every way. By being competitive right now, people have do something to make these individuals survives, being in the middle of often the crowded place and notice by surrounding. One thing that oftentimes many people have underestimated that for a while is reading. Sure, by reading a book your ability to survive raise then having chance to stay than other is high. For you who want to start reading the book, we give you that Multimedia Database Management Systems (The Springer International Series in Engineering and Computer Science) book as beginning and daily reading guide. Why, because this book is more than just a book.

#### **John Casale:**

Hey guys, do you wants to finds a new book to see? May be the book with the name Multimedia Database Management Systems (The Springer International Series in Engineering and Computer Science) suitable to you? The actual book was written by renowned writer in this era. The particular book untitled Multimedia Database Management Systems (The Springer International Series in Engineering and Computer Science)is the main one of several books that will everyone read now. This particular book was inspired many people in the world. When you read this publication you will enter the new dimension that you ever know prior to. The author explained their strategy in the simple way, therefore all of people can easily to be aware of the core of this book. This book will give you a lots of information about this world now. To help you see the represented of the world on this book.

#### **Keith Abell:**

People live in this new day of lifestyle always try to and must have the spare time or they will get large amount of stress from both daily life and work. So , whenever we ask do people have extra time, we will say absolutely sure. People is human not really a robot. Then we request again, what kind of activity are there when the spare time coming to you actually of course your answer will probably unlimited right. Then do you ever try this one, reading publications. It can be your alternative with spending your spare time, typically the book you have read will be Multimedia Database Management Systems (The Springer International Series in Engineering and Computer Science).

#### **Casey Timmons:**

Playing with family within a park, coming to see the sea world or hanging out with friends is thing that usually you will have done when you have spare time, in that case why you don't try factor that really opposite from that. A single activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Multimedia Database Management Systems (The Springer International Series in Engineering and Computer Science), it is possible to enjoy both. It is great combination right, you still wish to miss it? What kind of hang-out type is

it? Oh come on its mind hangout folks. What? Still don't understand it, oh come on its identified as reading friends.
