Lecture Notes on Principles of Plasma Processing

Francis F. Chen, Jane P. Chang

Lecture Notes on Principles of Plasma Processing Francis F. Chen, Jane P. Chang

Plasma processing of semiconductors is an interdisciplinary field requiring knowledge of both plasma physics and chemical engineering. The two authors are experts in each of these fields, and their collaboration results in the merging of these fields with a common terminology. Basic plasma concepts are introduced painlessly to those who have studied undergraduate electromagnetics but have had no previous exposure to plasmas. Unnecessarily detailed derivations are omitted; yet the reader is led to understand in some depth those concepts, such as the structure of sheaths, that are important in the design and operation of plasma processing reactors. Physicists not accustomed to low-temperature plasmas are introduced to chemical kinetics, surface science, and molecular spectroscopy. The material has been condensed to suit a nine-week graduate course, but it is sufficient to bring the reader up to date on current problems such as copper interconnects, low-k and high-k dielectrics, and oxide damage. Students will appreciate the web-style layout with ample color illustrations opposite the text, with ample room for notes.

This short book is ideal for new workers in the semiconductor industry who want to be brought up to speed with minimum effort. It is also suitable for Chemical Engineering students studying plasma processing of materials; Engineers, physicists, and technicians entering the semiconductor industry who want a quick overview of the use of plasmas in the industry.

From reader reviews:

Judith Bode:

The book Lecture Notes on Principles of Plasma Processing gives you the sense of being enjoy for your spare time. You may use to make your capable much more increase. Book can being your best friend when you getting tension or having big problem with your subject. If you can make reading through a book Lecture Notes on Principles of Plasma Processing to become your habit, you can get a lot more advantages, like add your capable, increase your knowledge about a few or all subjects. You could know everything if you like open up and read a publication Lecture Notes on Principles of Plasma Processing. Kinds of book are several. It means that, science reserve or encyclopedia or other folks. So, how do you think about this guide?

Marsha Young:

Do you among people who can't read enjoyable if the sentence chained inside the straightway, hold on guys this particular aren't like that. This Lecture Notes on Principles of Plasma Processing book is readable by simply you who hate the straight word style. You will find the facts here are arrange for enjoyable looking at experience without leaving perhaps decrease the knowledge that want to give to you. The writer involving Lecture Notes on Principles of Plasma Processing content conveys the thought easily to understand by many individuals. The printed and e-book are not different in the information but it just different as it. So, do you continue to thinking Lecture Notes on Principles of Plasma Processing is not loveable to be your top checklist reading book?

Vickie Duke:

Do you have something that you want such as book? The reserve lovers usually prefer to opt for book like comic, limited story and the biggest an example may be novel. Now, why not attempting Lecture Notes on Principles of Plasma Processing that give your entertainment preference will be satisfied through reading this book. Reading practice all over the world can be said as the way for people to know world considerably better then how they react toward the world. It can't be claimed constantly that reading practice only for the geeky man or woman but for all of you who wants to possibly be success person. So, for all of you who want to start studying as your good habit, you could pick Lecture Notes on Principles of Plasma Processing become your personal starter.

Teresa White:

Your reading sixth sense will not betray a person, why because this Lecture Notes on Principles of Plasma Processing e-book written by well-known writer we are excited for well how to make book which might be understand by anyone who read the book. Written throughout good manner for you, still dripping wet every ideas and producing skill only for eliminate your hunger then you still uncertainty Lecture Notes on Principles of Plasma Processing as good book but not only by the cover but also with the content. This is one book that can break don't assess book by its protect, so do you still needing another sixth sense to pick this

kind of!? Oh come on your looking at sixth sense already alerted you so why you have to listening to one more sixth sense.
