C++ for Java Programmers

Mark A. Weiss

C++ for Java Programmers Mark A. Weiss

Written for the moderately experienced Java programmer, this book builds on readers' existing knowledge of object-oriented programming and covers all important aspects of Standard C++—emphasizing more lower-level C-style details later in the presentation. Chapter topics include philosophy of C++, simplest C++, pointers and reference variables, object-based programming: classes, operator overloading, object-oriented programming: inheritance, templates, abnormal control flow, input and output, collections: the standard template library, primitive arrays and strings, C-style C++, and using Java and C++: the JNI. For new C++ programmers converted from Java.

From reader reviews:

Michael Milliner:

The book C++ for Java Programmers can give more knowledge and information about everything you want. So why must we leave a good thing like a book C++ for Java Programmers? Some of you have a different opinion about reserve. But one aim this book can give many information for us. It is absolutely suitable. Right now, try to closer along with your book. Knowledge or details that you take for that, it is possible to give for each other; you can share all of these. Book C++ for Java Programmers has simple shape however, you know: it has great and big function for you. You can look the enormous world by available and read a guide. So it is very wonderful.

Eva Burton:

This C++ for Java Programmers are usually reliable for you who want to become a successful person, why. The main reason of this C++ for Java Programmers can be one of many great books you must have will be giving you more than just simple reading through food but feed an individual with information that maybe will shock your previous knowledge. This book will be handy, you can bring it almost everywhere and whenever your conditions in e-book and printed versions. Beside that this C++ for Java Programmers forcing you to have an enormous of experience for example rich vocabulary, giving you trial run of critical thinking that we understand it useful in your day task. So , let's have it and revel in reading.

Scott Foust:

Reading a e-book tends to be new life style in this particular era globalization. With studying you can get a lot of information which will give you benefit in your life. Along with book everyone in this world can share their idea. Books can also inspire a lot of people. Lots of author can inspire their particular reader with their story or perhaps their experience. Not only the storyline that share in the textbooks. But also they write about the information about something that you need illustration. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that you can get now. The authors nowadays always try to improve their ability in writing, they also doing some investigation before they write to their book. One of them is this C++ for Java Programmers.

Jason Wahl:

Playing with family inside a park, coming to see the ocean world or hanging out with good friends is thing that usually you could have done when you have spare time, in that case why you don't try factor that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition details. Even you love C++ for Java Programmers, it is possible to enjoy both. It is excellent combination right, you still wish to miss it? What kind of hang type is it? Oh come on its mind hangout guys. What? Still don't buy it, oh come on its known as reading friends.
