Endoscopic Classification of Representations of Quasi-split Unitary Groups (Memoirs of the American Mathematical Society) Chung Pang Mok

In this paper the author establishes the endoscopic classification of tempered representations of quasi-split unitary groups over local fields, and the endoscopic classification of the discrete automorphic spectrum of quasi-split unitary groups over global number fields. The method is analogous to the work of Arthur on orthogonal and symplectic groups, based on the theory of endoscopy and the comparison of trace formulas on unitary groups and general linear groups.

From reader reviews:

Joanne Starks:

The book Endoscopic Classification of Representations of Quasi-split Unitary Groups (Memoirs of the American Mathematical Society) gives you the sense of being enjoy for your spare time. You need to use to make your capable far more increase. Book can for being your best friend when you getting anxiety or having big problem with your subject. If you can make looking at a book Endoscopic Classification of Representations of Quasi-split Unitary Groups (Memoirs of the American Mathematical Society) to be your habit, you can get a lot more advantages, like add your capable, increase your knowledge about a few or all subjects. You are able to know everything if you like open up and read a reserve Endoscopic Classification of Representations of Quasi-split Unitary Groups (Memoirs of the American Mathematical Society). Kinds of book are a lot of. It means that, science publication or encyclopedia or others. So , how do you think about this e-book?

James Sanchez:

The book with title Endoscopic Classification of Representations of Quasi-split Unitary Groups (Memoirs of the American Mathematical Society) possesses a lot of information that you can discover it. You can get a lot of gain after read this book. This specific book exist new information the information that exist in this reserve represented the condition of the world today. That is important to yo7u to learn how the improvement of the world. This kind of book will bring you in new era of the glowbal growth. You can read the e-book on your own smart phone, so you can read that anywhere you want.

Laura Lee:

People live in this new morning of lifestyle always make an effort to and must have the spare time or they will get wide range of stress from both lifestyle and work. So , when we ask do people have free time, we will say absolutely indeed. People is human not only a robot. Then we request again, what kind of activity do you have when the spare time coming to a person of course your answer will certainly unlimited right. Then do you try this one, reading publications. It can be your alternative inside spending your spare time, typically the book you have read is Endoscopic Classification of Representations of Quasi-split Unitary Groups (Memoirs of the American Mathematical Society).

Estella Pierre:

Your reading 6th sense will not betray a person, why because this Endoscopic Classification of Representations of Quasi-split Unitary Groups (Memoirs of the American Mathematical Society) reserve written by well-known writer who knows well how to make book which might be understand by anyone who have read the book. Written throughout good manner for you, leaking every ideas and writing skill only for eliminate your own personal hunger then you still hesitation Endoscopic Classification of Representations of Quasi-split Unitary Groups (Memoirs of the American Mathematical Society) as good book not merely by

the cover but also with the content. This is one guide that can break don't ascertain book by its handle, so do you still needing another sixth sense to pick this!? Oh come on your reading through sixth sense already said so why you have to listening to another sixth sense.
