Extreme Guns and Babes for an Adult World: Black and white Edition Jack Corbett

Borrowing a white tiger just to take the best pictures of a topless dancer posing with a German World War II Mauser might seem to be a little extreme for getting the reader's attention until you consider that author photographer Jack Corbett and his friends turned the White Tiger loose in a topless club afterwards. But "Extreme Guns and Babes for an Adult World" is not your average run of the mill book about guns. It is a collection of 26 articles the writer-photographer produced while writing for "Xtreme Magazine". This third edition of the book is printed in black and white whereas the 2nd edition is in full color and the first edition was published in Kindle. Each edition contains over 100 photos. There's over 26 models posing with the 26 weapons (or the Tiger), and all of them are feature entertainers and strippers. Jack Corbett's mission was one nearly every red blooded American male would envy which was he got to select his own models for his articles while getting to write about any gun he chose. And since Xtreme Magazine is a small East Coast adult magazine there was no bureaucracy to put up with. There's a lot of good stuff about guns here for all of you gun lovers out there. For instance, did you know why the Colt Python was the best .357 magnum revolver on the market or why Vietnam era M-16's are better man stoppers than the "improved models" being used today? Or why the underpowered, inaccurate (according to its detractors) M-1 carbine was the favorite weapon of Audie Murphy, America's most decorated World War II hero or how the German M42 machine gun outclassed the 30 caliber Browning used by American World War II soldiers? The book is labeled "adult" but this might be a misnomer. If you are looking for porn you will not find it here. If you are looking for complete nudity, there's been a coverup, as even though a large number of the pictures appearing in this book were shot in the nude, bare nipples and the most private portions of the models have disappeared into the dark recesses of Photoshop.
